- Unicode
- Drag & drop eases working in the whole system.
- Spooling automatically jobs.

- Easy definable filters, layouts and masks.

## Functions overview of MD-Premium.NET ERP

### CRM

When purchasing MD-Premium.NET ERP a small edition of the CRM module is already integrated. Create potential analysis, use the reminder system for calling customers after offering them something, or enter your customer appointments or reclamations directly at the customer master data and thus automatically into the integrated scheduler.

### Commercial Register - data synchronization

You can synchronize the master data by a push of a button with the data, which are entered in the Austrian Commercial Register. Furthermore you can call the balance sheet of companies.

### Integrated resource administration

The scheduler function is for entering employee appointments and for planning customer and maintenance orders and it brings those appointments directly onto the cellphones of your employees.

### Document management and filing

Ease your working flows in the purchase department and book all incoming invoices and the whole incoming goods automatically and file the documents electronically.

### Mobile logistic

Make logistical tasks like inventory entry, incoming goods entry, stock transfer postings, dispatch etc. with mobile handhelds, which only have to be online for the data transfer to MD-Premium.NET.

### Service and rental

Services or periodically services like maintenance works or rentals require precision and a good documentation. With task lists and a good traceability MD-Premium.NET supports you at all periodically orders.

### Flexible reporting

Each company has its own idea of business analyses and statistics. Therefore each of the about 100 in the standard software scope of supply contained reports can be adapted.

### Do you still report or do you already analyze?

Integrated OLAP & charts-system (Online Analytical Processing) for compiling multidimensional analyses in the reports explorer.

An advanced and feature complete pivot table control provides unrivalled insights into daily operations.

With this tool you are able to slice and dice information efficiently and you will have an extremely intuitive end-user experience.

The tool delivers numerous layout customization options with total end-user control over each individual on-screen report.

- The analysis tool has the power to convert hard to read and difficult to dissect dataset information into compact and summarized visual reports, what delivers data for real-time business analysis.
- Print and export data - instant crosstab reports in PDF, XLS, HTML formats and on paper.
- Different levels of details for flexible data analysis.
- Hierarchical data display - raw and summarized data in a single report.
- Automatic and manually calculated totals.
- Sort data and display top or bottom numbers - easily access the most important information.

### Your benefits

- **Profit by software directly from the producer**

Fast reactions to your demands and furthermore competent and quick realization of individual programming works.

- **Fitting solution for everyone**

By focusing on individual customer support, industry branch specificity and flexibility each customer gets exactly that solution he really needs.

- **Oracle database**

MD-Premium.NET uses all advantages of the worldwide biggest database provider and thus has not to accept performance deprivations by different layers. You profit furthermore by the continuous development of Oracle at every release with new functions.

- **No Limits**

By embedding the Oracle database you have the advantage of a nearly endless scalability and thus no limit at the number of users.

- **Data security**

Data reliability is given by mirrored databases.

- **Location comprehensive installations**

... are no problem by shared database installations.

- **Partners**

Long-lasting close cooperation with many other companies: This manifold IT know-how is included in the software range and avoids "business myopia".

Furthermore we offer you a broad range of trained partners who can help individually on site!
